TO: Rio Dell City Council

FROM: Karen Dunham, City Clerk

THROUGH: Jim Stretch City Manager

DATE: January 21, 2014

SUBJECT: Upgrade of City Council Chambers Public Address System

### **RECOMMENDATION**

Approve upgrade of City Council Chambers Public Address System and authorize the City Manager to contract with Sound Advice to complete Phase 1 and 2 of the proposed improvements for an amount not to exceed \$6,500.00.

### **BACKGROUND AND DISCUSSION**

As you will recall, this item was presented to the Council at the December 3, 2013 regular meeting. At the conclusion of the discussion, no action was taken as the Council felt more information was needed and perhaps other options should be explored before making a decision on the purchase of new sound equipment. Suggestions were made by a person in the audience including the purchase of mic filters to improve the quality of sound. Staff inquired on the cost for 9 mic filters (windscreens) and was provided an estimate of \$145.00 although the items were on backorder from the company. Craig Pedley advised staff that the filters only help when a speaker has their mouth right on top of the mic and indicated one of the biggest problem with the current sound system is that the existing microphones are made to be used as hand-held mics and to be effective they must be spoken into from a distance of 4 to 5 inches. Also, the locations of the speakers mounted on the ceiling make them somewhat ineffective. In addition, the acoustics in the room are poor which makes it even more difficult for people in the back of the room to hear. He indicated that an acoustical treatment installed on the wall behind the Council dias would significantly improve the quality of sound in the room. Based on his initial evaluation, the following recommendations were made:

#### **Phase 1:**

Install (9) new gooseneck table microphones including bases, mute buttons and cables; move ceiling speakers one bay toward rear of room; repair floor jack connection; and reset controls. **\$3,849.38**

**Phase 2**

Install acoustical wall panels and mounting plates on the front/side wall of the  
Council Chambers. **\$2,359.06**

The total cost for equipment and labor for Phase 1 and 2 is \$6,208.44.

**CITY OF RIO DELL  
STAFF REPORT  
CITY COUNCIL AGENDA  
January 21, 2014**

TO: Mayor and Members of the City Council  
THROUGH: Jim Stretch, City Manager  
FROM: Rick Chicora, Wastewater Superintendent  
DATE: January 21, 2014  
SUBJECT: **Bio Solids Giveaway Program**

**RECOMMENDATIONS**

Authorize the giveaway of the wastewater plant's Exceptional Quality Class A Bio Solids to City residents as first priority, and to other county residents as a second priority if required to dispose of excess biosolids product.

**BACKGROUND AND DISCUSSION**

As the Council may recall, on December 17, 2013 you received a staff report concerning the disposition of a quantity of biosolids stored at the Public Works Corporation. There were questions mainly about the safety of the product and the item was tabled until additional information was received. After contacting multiple sources, we believe we have received answers to all the questions that were raised and that information is included in this report.

As background again, during the summer of 2013 the City entered into an agreement with Hank Brenard Environmental to purchase our biosolids for \$40.00 a ton. Before we could start sending the bio solids to his facility, he went out of business. During this period, the biosolids product has been accumulating and now has become a burden. We would like the Council's permission to go in a different direction.

After exploring different ideas with other plant operators in the area, it is proposed that the City establish a program similar to Fortuna's whereby we offer our Class A biosolids to City residents free, with proof of residency, on a first come first serve basis. If we get to a point where the demand for the product is less than our production, then the program would be expanded to Humboldt County residents outside of the City.

Staff proposes to advertise these giveaways on the City's website and will post the event around the community. If that doesn't produce satisfactory results, we can advertise in the Humboldt Beacon. Each person that comes to the plant at the Corporation Yard to receive the biosolids would be required to sign the attached hold harmless (release of liability) agreement, and supply a tarp to cover the material during transport.

Since the plant only produces about 2 yards of biosolids a week, these free events would generally occur every few months. The free biosolids events will occur during the normal work week at the Corporation Yard, so no additional staff cost will occur.

As far as the concerns some of the City Council members have had, I've talked to another municipality in Kentucky that has a dryer like ours. They did a lab study on their dried bio solids and compared it to some local farmer's fertilizers that they use and the numbers are quite surprising. They tested their dried solids and it contained 5.9% nitrogen, 6.2% phosphorus and zero potassium. In comparison, the most commonly used commercial grade fertilizer di-ammonium phosphate, contains 18% nitrogen, 46% phosphorus and zero potassium. As you can see, the bio solids were not very strong compared to a commercial product.

I also contacted the Water Quality Control Board and questioned them about pharmaceuticals in bio solids. They told me that right now or even in the next few years there are no testing requirements. The only requirements are the metals testing and salmonella and coliform testing, which we've already done and are in compliance for the Exceptional Quality Class A category.

## **BUDGETARY IMPACT**

No revenue from the sale of biosolids was anticipated in the 2013-14 budget and no extra salaries are to be paid to administer the program. Thus, there is no financial impact from the program. However, there would be a budget impact if we have to pay to dispose of the material.

## **ATTACHMENTS:**

Comment: BioVir performing T.S% per schedule, not marked on COC

Biosolids are composted for 15 days at temperatures in excess of 140 degrees to destroy pathogens and are tested quarterly for metals content to ensure Exceptional Quality status and safety of the finished material. Results of tests performed in 2013 are presented in Table 6. Fecal coliform results were exceptionally high due to reduced drying time as we were attempting to expedite our process. We did meet the 40-503 standards for salmonella which is what is required for Class A compost. We only tested two lots of compost which was during the 2<sup>nd</sup> and 3<sup>rd</sup> quarters of 2013.

**Table 6: Biosolids Quality Monitoring 2013**

#### 4. MAINTENANCE

##### *a. Maintenance Summary*

The WWTP performed a variety of scheduled, preventative, predictive and breakdown maintenance on a wide variety of equipment. The main goal of maintenance activities is to ensure equipment availability to meet plant process operation requirements.

The WWTP work area includes all major and auxiliary processes. Maintenance minimizes callouts, reduces overtime costs, limits potential for discharge violations due to mechanical failure, and costs associated with repairs are significantly lower than replacement costs. In addition to routine lubrication and preventative maintenance activities, the following emergency and predictive maintenance was completed in 2013:

675 Wildwood Avenue  
Rio Dell, CA 95562  
(707) 764-3532

To: Karen Dunham, City Clerk  
From: Rick Chicora, Wastewater Superintendent  
Date: 12/10/13  
Subject: Ad for Bio Solids Giveaway

Could you please arrange to have this ad appear in the Humboldt Beacon.

The City of Rio Dell will be hosting a week long promotional give away for Exceptional Quality Class A Bio Solids for beneficial reuse as a soil amendment for your property or place of residence beginning on Monday January 6<sup>th</sup> thru 10<sup>th</sup> or until supply is gone, on a first come first serve basis. Loading hours will be 9:00 am to 3:30 pm each day at the Rio Dell Wastewater Treatment Plant which is located at 475 Hilltop Dr.

Everyone will be required to sign a "hold harmless" release of liability, and drivers must have tarps for covering the material while transporting from the facility. More information is available by calling 764-5754.

## HOLD HARMLESS, INDEMNIFICATION, AND RELEASE AGREEMENT

This Agreement is executed on this \_\_\_\_\_ day of \_\_\_\_\_, 2013, by and between the City of Rio Dell, a municipal corporation of the State of California, hereinafter called CITY, and \_\_\_\_\_, herein called RELEASOR.

### WITNESSETH

WHEREAS, City produces composted biosolids from its wastewater treatment facility, which solids are regulated by the California EPA (Cal EPA) and the North Coast Regional Water Quality Control Board (NCRWQCB); and

WHEREAS, said biosolids meet the "Class A, Exceptional Quality" criteria of the Cal EPA 503 Regulations, with regards to concentrations of regulated metals, pathogen reduction, and vector attractions reduction; and

WHEREAS, Releaser desires to purchase from City said biosolids for their personal agricultural application, and

WHEREAS, City is requiring Releaser to enter into this Hold Harmless, Indemnification, and Release Agreement for the purchase of said composted biosolids as specified herein;

Now, THEREFORE, it is MUTUALLY AGREED as follows:

Releaser, their successors and assigns, in consideration of City agreeing to sell Releaser composted biosolids, agrees to indemnify, release, hold harmless and to defend the City, its officers, officials, employees and agents from and against any and all claims for damages, losses and expenses including attorney fees arising out of the sale and Releaser's use of composted biosolids described herein, which may be made by reason of death, personal injury or damage to property sustained by any person, firm, or corporation, arising directly or indirectly from or in connection with claims related to the sale and use of composted biosolids..

I agree, for myself, my successors and assigns, to indemnify, release, hold harmless and to defend the City, its officers, officials, employees, and agents from and against any and all claims for damages, losses, and expenses including attorney fees arising out of the application of composted biosolids to my land, which may be made by reason of death, personal injury, or damage to property sustained by any person, firm, or corporation, arising directly or indirectly from or in connection with claims related to the application of composted biosolids to my land.

This release is intended to discharge the City, its officers, officials, and employees from and against any and all liability arising out of or connected in any way with the application of composted biosolids to my land, even though that liability may arise out of negligence or carelessness on the part of the City of its officials, officers, employees or agents.

In witness whereof, the parties hereto have caused this Agreement to be executed the day and year first above written.

January 7, 2014

TO: Honorable Mayor and City Council Members

FROM: Jim Stretch ~~City~~ Manager

SUBJECT: Surplus (2) Public Works Trucks and Purchase (1) Used 2002 ¾ Ton Pickup

**IT IS RECOMMENDED THAT THE CITY COUNCIL:**

1. Declare a nonoperational 1995 Chevrolet ½ ton pickup truck (Vin# - 1GCEK14KXSZ209150) and a deteriorating 1993 Ford F-350 pickup truck (Vin#- 1FDKF37H7REA00822) surplus to the City, to be offered as trade-in or credit for a replacement vehicle, and
2. Approve the purchase of good condition used 2002 ¾ ton GMC diesel pickup at a cost not to exceed \$12,000, spread 25% to the Streets, 25% each to Water and 50% to the Wastewater Fund, and
3. Defer the purchase of the used \$50,000 Roller approved in the 2013-14 Capital & Programs budget until the 2014-15 fiscal year.

**BACKGROUND AND DISCUSSION**

The attached interoffice letter dated 12-3-13 from the Streets Superintendent to the City Manager explains the present situation with trucks used on a daily basis by the Streets, Water and Wastewater Funds

The Public Works Department has (1) 20 year old pickup that has not been operational for a couple of years and a 21 year old model that is rarely used due to a multitude of electrical and mechanical problems. The Department has located a local 2002 GMC 4x 4 ¾ ton diesel that is in good mechanical condition with an asking price of \$10,900, plus tax and license. The seller reconditions vehicle and will take the City's old units in trade.

Funding for the purchase is to be provided amongst the Funds at 25% Streets, 25% Water and 50% Wastewater. Since the Water fund does not have the funding to share the cost, it is proposed that the purchase of a used Roller included in the 2013-14 Final Budget be deferred until next fiscal year. The Water Fund's share of that cost was \$7,500 as compared to \$3,000 for the 2002 GMC pickup.

The recommendation is to declare (2) old pickup trucks surplus to be as trade-in value; authorize the purchase of a 2002 reconditioned 6.6 liter diesel GMC pickup not to exceed \$12,000 and defer the purchase of a used Roller (\$50,000) this fiscal year to free up the money to make the purchase.

Cc: Streets Superintendent  
Wastewater Superintendent  
Finance Department

675 Wildwood Avenue  
Rio Dell, CA 95562  
(707) 764-3532

To: Jim Stretch, City Manager  
From: Randy Jensen, Water / Roadways Sup.  
Date: January 3, 2014  
Subject: Public Works Vehicle Purchase

Jim,

An opportunity has presented itself recently to purchase a 2002 GMC 2500 4x4 Truck for the Public Works Dept. This vehicle would replace our 1994 Ford 1 ton. With this purchase, the 1994 Ford and the 1993 Chevy (that has been parked for over a year) will be used as a trade in.

Currently the public works department has a 1994 Ford 1 ton truck that has been quickly deteriorating. There has been recent motor and clutch issues, ongoing electrical problems and its general practical usefulness for the department. The department has only used this vehicle lately at a minimum, and the sole purpose for asphalt cold patching due to its reliability and problems. The 1994 Chevy truck was parked and put on the department's surplus list at the time of purchasing the 1996 Ford 4x4 from Del Oro Water Company in Ferndale.

With the purchase of the 2002 GMC, this vehicle will carry the Utility canopy box and slide out bed that was originally installed in the Police truck. The 2002 GMC will be the primary vehicle for towing the sewer machine due to the sewer machines weight factor. Also, by having the Utility Canopy and slide out bed, it can also be used to house the utility line locating equipment and other sensitive electronic equipment while keeping them protected from the weather.

The specification on the 2002 GMC and asking price:

Price –	\$10,900 + tax and licensing
Year –	05/2002
Make –	GMC
Drive train –	4x4 - 3 / 4 Ton
Engine –	Diesel 6.6 liter
Miles –	113474
Transmission –	Allison Tranny

riodellcity.com*

January 21, 2014

TO: Honorable Mayor and City Council

FROM: Jim Stretch, City Manager

SUBJECT: Appointment of Council member to Wildwood Avenue Sculpture Committee

IT IS RECOMMENDED THAT THE CITY COUNCIL:

Approve one member of the City Council to serve on the Wildwood Avenue Sculpture Committee and the Community Development Director Kevin Caldwell

BACKGROUND AND DISCUSSION

On January 7, 2014 the Rio Dell City Council approved guidelines for the Wildwood Avenue Sculpture Program, including establishing the membership of a 5 person Committee. The City's Community Development Director is the only designated person of the group.

The Guidelines call for the City Council to appoint a member of the Council to the Committee. The only limitation is that the Council member not be a member of either the Scotia/Rio Dell Chamber of Commerce or the Eagle Prairie Arts District.

---

675 Wildwood Avenue  
Rio Dell, CA 95562  
(707) 764-3532

For Meeting of: January 21, 2014

To: City Council

From: Kevin Caldwell, Community Development Director 

Through:  Jim Stretch, City Manager

Date: January 14, 2014

Subject: Adoption of Ordinance No. 308-2014 establishing Environmentally Sensitive Habitat Area (ESHA) Regulations, Section 17.30.080 of the Rio Dell Municipal Code (RDMC).

---

---

**Recommendation:**

That the City Council:

1. Receive staff's report regarding the proposed text amendments; and
2. Continue the public hearing, receive public input, and deliberate; and
3. Adopt Ordinance No. 308-2014 establishing Environmentally Sensitive Habitat Area (ESHA) Regulations, Section 17.30.080 of the Rio Dell Municipal Code (RDMC).
4. Direct the City Clerk, within 15 days after adoption of the Ordinance, to post an adoption summary of the Ordinance with the names of those City Council members voting for or against, or otherwise voting in at least three (3) public places and to post in the office of the City Clerk a certified copy of the full text of the adopted Ordinance pursuant to Section 36933(a) of the California Government Code.

## Background/Summary

Staff presented the Planning Commission's recommended Environmentally Sensitive Habitat Area (ESHA) regulations to the City Council at the meeting of January 7, 2014. As reported at the meeting, the Land Use Element and the recently adopted Open Space and Conservation Element contain policies that call for the protection of environmentally sensitive habitat. In addition, the General Plan contains implementation measures that call for the establishment of Environmentally Sensitive Habitat Area (ESHA) regulations.

The purpose of the regulations is to ensure that Environmentally Sensitive Habitat Areas (ESHA's) such as the Eel River corridor, streams and drainage channels with riparian habitat, and forested areas that could potentially support sensitive species are buffered to protect against any significant disruption of their habitat values and are also protected for both the wildlife inhabiting them as well as the enjoyment of present and future residents of the City

### Zone Reclassification Required Findings:

1. The proposed amendment is consistent and compatible with the General Plan and any implementation programs that may be affected.

The Zoning Regulations do not currently contain provisions regarding environmentally sensitive habitat areas. Chapter 2, *Natural Environment*, of the General Plan contains goals to preserve and protect river, streams, drainage channels and natural habitats. Policy P2.1.7-2 of the General Plan contains the following language:

*P2.1.7-2 Ensure that environmentally sensitive habitat areas (ESHA's) such as the Eel River corridor, streams and drainage channels with riparian habitat, and forested areas that could potentially support sensitive species are buffered to protect against any significant disruption of their habitat values.*

Accordingly, the corresponding implementation measure requires the City to: "...prepare Development Regulations that require identification of open space and sensitive habitat areas in proposed developments."

In addition, the recently adopted Conservation and Open Space Element also contains a number of goals, policies and implementation measures calling for the protection of environmentally sensitive habitats, including the establishment of development regulations.

The proposed establishment of Environmentally Sensitive Habitat Area (ESHA) regulations is consistent with the General Plan.

**2. The proposed amendments have been processed in accordance with the California Environmental Quality Act (CEQA).**

The primary purpose of the California Environmental Quality Act (CEQA) is to inform the decision makers and the public of potential environmental effects of a proposed project.

Based on the nature of the project, staff has determined that the project is Statutorily Exempt pursuant to Section 15061(b) (3) of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations. Pursuant to Section 15061(b) (3) of the CEQA Guidelines this exemption is covered by the general rule that CEQA applies only to projects which have the potential for causing a *significant* effect on the environment. Where it can be seen with certainty that there is no possibility that the project in question may have a significant effect on the environment, the project is not subject to CEQA. The City currently has no environmentally sensitive habitat regulations requiring the protection of natural resources. The proposed Environmentally Sensitive Habitat Area (ESHA) regulations will provide for the protection of environmentally sensitive resources. Based on the nature of the proposed amendments, staff believes there is no evidence to suggest that the amendments will have a significant effect on the environment.

**Financial Impact**

The City is responsible for the costs associated with the proposed amendment. The cost is insignificant and will not result in additional budget expenditures or revisions.

**Attachments:**

1. Ordinance No. 308-2014 establishing Environmentally Sensitive Habitat Area regulations, Section 17.30.080 of the Rio Dell Municipal Code.
2. Post Adoption Summary.

**ORDINANCE NO. 308 – 2014**

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF RIO DELL REGARDING  
THE ESTABLISHMENT OF ENVIRONMENTALLY SENSITIVE HABITAT AREA  
REGULATIONS, SECTION 17.30.080 OF THE RIO DELL MUNICIPAL CODE:

THE CITY COUNCIL OF THE CITY OF RIO DELL ORDAINS AS FOLLOWS:

**WHEREAS** the Zoning Regulations do not contain provisions regarding environmentally sensitive habitat areas; and

**WHEREAS** Chapter 2, *Natural Environment*, of the General Plan contains goals to preserve and protect river, streams, drainage channels and natural habitats; and

**WHEREAS** the corresponding implementation measure requires the City to: "...prepare Development Regulations that require identification of open space and sensitive habitat areas in proposed developments." and

**WHEREAS** the recently adopted Conservation and Open Space Element also contains a number of goals, policies and implementation measures calling for the protection of environmentally sensitive habitats, including the establishment of development regulations; and

**WHEREAS** the purpose of the proposed regulations is to ensure that environmentally sensitive habitat areas are protected for both the wildlife inhabiting them as well as the enjoyment of present and future residents of the City; and

**WHEREAS** the City has reviewed and processed the proposed amendments in conformance with Sections 65350 – 65362 of the California Government Code; and

**WHEREAS** the City has reviewed and processed the proposed amendments in conformance with Section 17.35.010 of the City of Rio Dell Municipal Code; and

**WHEREAS** the City finds that based on evidence on file and presented in the staff report that the proposed amendment is consistent and compatible with the General Plan and any implementation programs that may be affected; and

**WHEREAS** the proposed amendment has been processed in accordance with the applicable provisions of the California Government Code and the California Environmental Quality Act (CEQA); and

**NOW, THEREFORE, BE IT RESOLVED** that the City Council of the City of Rio Dell finds that:

1. The proposed amendments are consistent with the General Plan and any applicable specific plan; and
2. The City has determined that the proposed amendments are Statutorily Exempt pursuant to Section 15061(b) (3) of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations.

**NOW, THEREFORE, BE IT FURTHER RESOLVED** that the City Council of the City of Rio Dell does hereby ordain as follows:

**Section 1.** Section 17.30.080 of the Rio Dell Municipal Code is hereby established as follows:

**17.30.080 Environmentally Sensitive Habitat Areas (ESHA's)**

**(1) Purpose**

The purpose of these regulations is to ensure that environmentally sensitive habitat areas are protected for both the wildlife inhabiting them as well as the enjoyment of present and future residents of the City.

The presence of environmentally sensitive habitat in the vicinity of a proposed project shall be determined during the review process for discretionary projects and for ministerial building and grading permit applications, when the proposed building development activity involves new construction or expansion of existing structures or grading activities. Wetland delineation by a qualified biologist using criteria acceptable to the Department of Fish and Game may be necessary and shall be required when wetland characterization and limits cannot be easily identified by a site inspection.

**(2) Definitions**

(a) "Environmentally Sensitive Habitat Areas" (ESHA's) means anadromous fish streams, perennial and intermittent streams, sensitive species rookeries and nest sites, wetlands, riparian areas and habitats of rare and endangered plants and animals.

(b) "Riparian Corridor" means the area between the top of streambanks or hinge-points of the streambanks containing riparian vegetation and the adjacent upland area.

(c) "Riparian Vegetation" means pertaining to, or situated on the banks of a stream, river, lake or pond such as willows, alders, cottonwood, wax myrtle, big leaf maple, California laurel, red elderberry, etc.

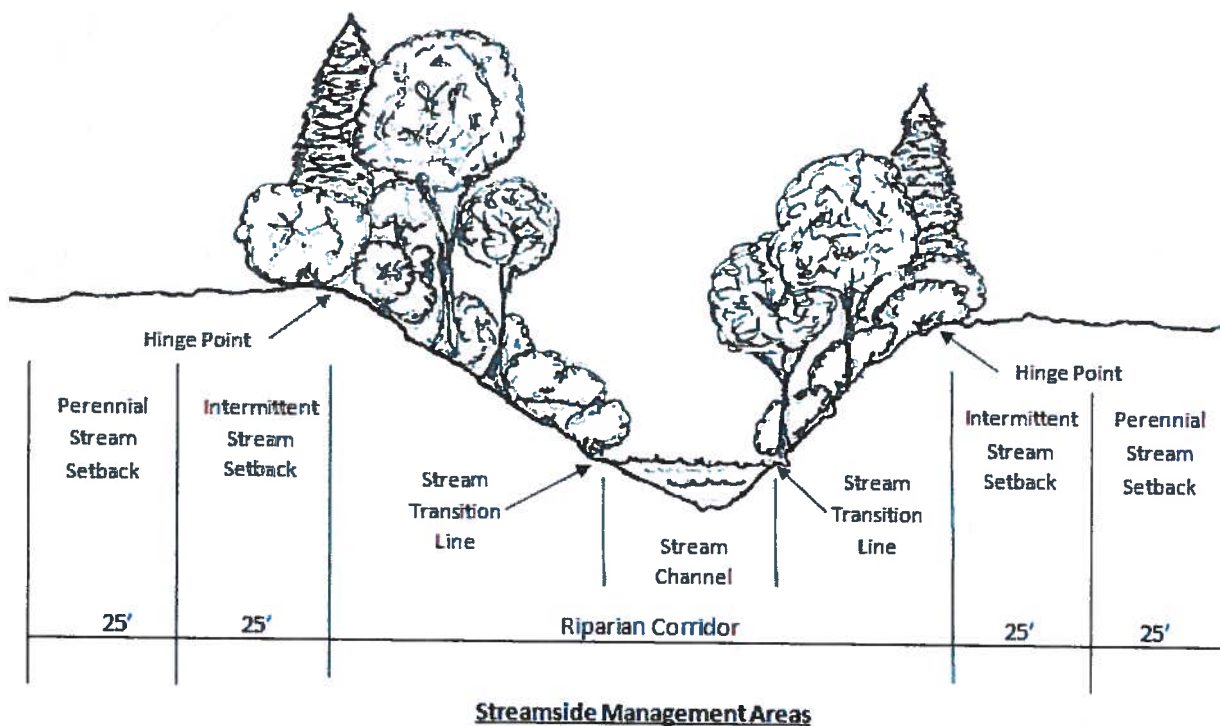

(d) "Stream Channel" means the area of a stream between its stream transition lines.

(e) "Streamside Management Areas (SMA's)" means riparian buffer areas for protecting sensitive fish and wildlife habitats and minimizing erosion, runoff and interference with surface water flows.

(f) "Stream Transition Line" means the line closest to a stream where riparian vegetation is permanently established.

(g) "Wetlands" means lands which may be covered periodically or permanently with shallow water and which include saltwater marshes, freshwater marshes, open or closed brackish water marshes, swamps, mudflats, fens, and vernal pools. (Fish and Game Code, Section 2785(g)).

(h) Definitions Diagram

### (3) Development Standards

(a) Stream Channels. Development within stream channels is limited to the following projects.

(1) Fishery, wildlife, and aquaculture enhancement and restoration projects.

- (2) Road crossings subject to Section 1600 *et seq* of the Fish and Game Code.
- (3) Flood control and drainage channels, levees, dikes, and floodgates.
- (4) Mineral extraction consistent with other State regulations.
- (5) Small-scale hydroelectric power plants in compliance with applicable State regulations.
- (6) Wells and spring-boxes, and agricultural diversions.
- (7) New fencing, so long as it would not impede the natural drainage or wildlife movement and would not adversely affect the stream environment or wildlife movement.
- (8) Bank protection, provided it is the least environmentally damaging alternative.
- (9) Other essential projects, including municipal groundwater pumping stations and infiltration galleries provided they are the least environmentally damaging alternative, or necessary for the protection of the public's health and safety.

(b) Streamside Management Areas. Development within Streamside Management Areas shall be limited to the following uses:

- (1) Development permitted within stream channels.
- (2) Public access parking areas and trails when it can be demonstrated that it would not degrade fish and wildlife resources or water quality, and that vegetative clearing is kept to a minimum.
- (3) Timber management and harvests activities under a timber harvesting plan or non-industrial timber management plan, or activities exempt from local regulation as per California Public Resources Code 4516.5(e)
- (4) Road and bridge replacement or construction, when it can be demonstrated that it would not degrade fish and wildlife resources or water quality, and that vegetative clearing is kept to a minimum.
- (5) Removal of vegetation for disease control or public safety purposes.
- (6) Bank stabilization projects when it can be demonstrated that it would not degrade fish and wildlife resources or water quality, and that vegetative clearing is kept to a minimum.

(c) Streamside Management Areas are identified and modified as follows:

(1) Fifty (50) feet, measured as the horizontal distance from the hinge-point of the riparian corridor on each side of perennial streams.

(2) Twenty-Five (25) feet, measured as the horizontal distance from the hinge-point of the riparian corridor on each side of intermittent streams.

(d) Where necessary, the width of Streamside Management Areas may be expanded to include significant areas of riparian vegetation adjacent to the buffer area, slides and areas with visible evidence of slope instability, not to exceed 100 feet measured as the horizontal distance from the hinge-point of the riparian corridor on each side of perennial streams and 50 feet measured as the horizontal distance from the hinge-point of the riparian corridor on each side of intermittent streams.

(e) The Streamside Management Area shall be reduced or eliminated where the City determines, based on specific factual findings, that it will not result in a significant adverse impact to fish, wildlife, riparian habitat, or soil stability.

#### **(4) Mitigation Measures.**

Mitigation measures for development within Streamside Management Areas shall, at a minimum, include:

(a) Retaining snags unless felling is required by CAL-OSHA, or by California Department of Forestry (CALFIRE) forest and fire protection regulations, or for public health and safety reasons, approved by the appropriate agency. Felled snags shall be left on the ground if consistent with fire protection regulations as long as they have no economic value.

(b) Retain live trees with visible evidence of use as nesting sites by hawks, owls, eagles, osprey, herons, or egrets.

(c) Replanting of disturbed areas with riparian vegetation (including such species as alders, cottonwoods, willows, sitka spruce, etc.) shall not be required unless natural regeneration does not occur within two years of the completion of the development project.

(d) Erosion control measures for development within Streamside Management Areas shall include the following:

(1) During construction, land clearing and vegetation removal shall be minimized.

(2) Construction sites shall be mulched with natural or chemical stabilizers to aid in erosion control and insure re-vegetation.

(3) Long slopes shall be minimized to increase infiltration and reduce water velocities down cut slopes by such techniques as soil roughing, serrated cuts, selective grading, shaping, benching, and berm construction.

(4) Concentrated runoff shall be controlled by the construction and continued maintenance of culverts, conduits, non-erodible channels, diversion dikes, interceptor ditches, slope drains or appropriate mechanisms. Concentrated runoff will be carried to the nearest drainage course. Energy dissipaters may be installed to prevent erosion at the point of discharge where discharge is to natural ground or channels.

(5) Runoff shall be controlled to prevent erosion by on-site or off-site methods. On-site methods include, but are not limited to, the use of infiltration basins, percolation pits, or trenches. On-site methods are not suitable where high groundwater or slope stability problems would inhibit or be aggravated by on-site retention or where retention will provide no benefits for groundwater recharge or erosion control. Off-site methods include detention or dispersal of runoff over non-erodible vegetated surfaces where it would not contribute to downstream erosion or flooding.

(6) Disposal of silt, organic, and earthen material from sediment basins and excess material from construction will be disposed of out of the Streamside Management Area to comply with California Fish and Game and Regional Water Quality Control Board.

(e) Winter operations (generally October 15 thru April 15) shall employ the following special considerations:

(1) Slopes shall be temporarily stabilized by stage seeding and/or planting of fast germinating seeds such as barley or rye grass; and mulched with protective coverings such as natural or chemical stabilizations.

(2) Runoff from the site shall be temporarily detained or filtered by berms, vegetated filter strips, and/or catch basins to prevent the escape of sediment from the site. Drainage controls are to be maintained as long as necessary to prevent erosion throughout construction.

**(5) Other Wet Areas.**

Development, except for wells and spring-boxes, in or adjacent to other wet areas, including natural ponds, springs, vernal pools, marshes and wet meadows (exhibiting standing water yearlong or riparian vegetation) shall be consistent with the standards for streamside management areas, where appropriate.

**Section 2. Severability**

If any provision of the ordinance is invalidated by any court of competent jurisdiction, the remaining provisions shall not be affected and shall continue in full force and effect.

### Section 3. Limitation of Actions

Any action to challenge the validity or legality of any provision of this ordinance on any grounds shall be brought by court action commenced within ninety (90) days of the date of adoption of this ordinance.

### Section 4. CEQA Compliance

The City Council has determined that the adoption of this ordinance is exempt from review under the California Environmental Quality Act (CEQA), pursuant to Section 15061(b)(3) of the CEQA Guidelines. The City currently has no environmentally sensitive habitat regulations requiring the protection of environmentally sensitive habitat. The proposed Environmentally Sensitive Habitat Area (ESHA) regulations will provide for the protection of environmentally sensitive resources. Due to the nature of the proposed code revision, there is no evidence that a *significant* impact to the environment would occur as a result of adoption of the Ordinance.

### Section 5. Effective Date

This ordinance becomes effective thirty (30) days after the date of its approval and adoption.

**I HEREBY CERTIFY** that the forgoing Ordinance was duly introduced at a regular meeting of the City Council of the City of Rio Dell on January 7, 2014 and furthermore the forgoing Ordinance was passed, approved and adopted at a regular meeting of the City Council of the City of Rio Dell, held on the 21<sup>st</sup> of January 2014 by the following vote:

**Public Notice**  
**City of Rio Dell City Council**  
**SUMMARY FOR POSTING AFTER ADOPTION OF ORDINANCE**

(The summary shall be published or posted within 15 calendar days after the adoption of the ordinance)

**Summary**

On **Tuesday, January 21, 2014 at 6:30 p.m.**, the Rio Dell City Council held a public hearing in the City Council Chamber at City Hall and approved and adopted **Ordinance No. 308-2014 establishing Environmentally Sensitive Habitat Area (ESHA) Regulations, Section 17.30.080 of the Rio Dell Municipal Code (RDMC).**

Section 36933(a) of the California Government Code requires that the City Clerk, to post a summary of the Ordinance within 15 days of adoption with the names of those City Council members voting for or against, or otherwise voting in at least three (3) public places and to post in the office of the City Clerk a certified copy of the full text of the adopted Ordinance. Said Ordinance was passed, approved and adopted at a regular meeting of the City Council of the City of Rio Dell, held on the January 21, 2014 by the following vote:

AYES:

NOES:

ABSENT:

ABSTAIN:

A certified copy of the full text of the Ordinance is posted in the office of the City Clerk at 675 Wildwood Avenue in Rio Dell. General questions regarding the Ordinance and the process should be directed to Kevin Caldwell, Community Development Director, (707) 764-3532 or Graham Hill, Police Chief, (707) 764-5641.

**675 Wildwood Avenue  
Rio Dell, CA 95562  
(707) 764-3532**

To: Honorable Mayor and Members of the City Council  
Through: Jim Stretch, City Manager  
From: Graham Hill, Chief of Police   
Date: January 21, 2014  
Subject: Police Statistics for 2013 calendar year

#### **Action**

Receive and File

#### **Summary**

The Police Department took a total of 2,660 calls for service during 2013. Approximately 345 of the calls for service resulted in a crime report. Of those crime reports approximately 239 were disposed of pursuant to an arrest.

In 2012 there were 685 Incident reports taken in comparison to 486 total incidents reports taken in 2013. A reduction of about 30%. Our coverage has remained largely the same for 2012 and 2013 and while overall we have experienced a reduction in crime, we have seen an increase in certain areas; most notably we have experienced an increase in DUI's, warrant arrests, misdemeanor domestic violence, and burglary.

See attached statistics for specific data regarding police activity for 2013.
